

Archive your projects and organize everything from patterns to tool information with this new software application.

## Organizational Software for Scrollers

My Scroll Saw Projects™, Basic Edition, a new software package by FJP Data Management Services, gives scrollers a leg up on organizing their work.

The software gives scrollers a way to document their work. There is a section dedicated to individual projects, where you can record the pattern used and the materials and tools used along with a photograph of the completed project.

Another section is dedicated to your pattern inventory. Here you can record and search your patterns by subject, designer, or storage location. There is also a place to record your customers, vendors, and information about your tools.

The basic edition, according to Franklin J. Payne, president of the company, is geared for the beginner and intermediate hobby scrollers. The advanced edition is in development at this time. It is geared more for professional scrollers, who make their living using a scroll saw.

The software is available for \$34.95 + \$7 s&t to the US, Canada, and Mexico (\$9 s&t International) from FJP Data Management Services, P.O. Box 811, East Olympia, WA 98540, [www.fjpdms.net](http://www.fjpdms.net).
